## Mayor's Report

---

Waterville, Maine, February 2, 1926.

To the Members of the City Council:

I have the honor to present at this time a brief summary of the work of the City Government during the past eleven months. While there has been many things left undone that we would liked to have accomplished, still I feel that with the increasing demands made thru traffic, schools, and most other departments, we have made a creditable showing.

### STREETS

There has been one thing more clearly demonstrated this year than ever before and that is the fact that dirt or gravel streets will not stand the tremendous amount of motor traffic of today and in time are more expensive than concrete.

### POOR DEPARTMENT

Owing to labor conditions in the factories this department has had a heavy burden to carry all of this year. Also the large number of convictions in violation of the Volstead Act have placed a large number of families on the City for support.

### FIRE DEPARTMENT

We found the condition and amount of hose in use in this department in such poor condition that it was necessary to purchase 2,000 feet of hose early in the year.

### STATE AID ROADS

By changing location of State Aid Road from North Street to College Avenue and voting five times our legal appropriation we were able to construct 3,363 feet of concrete street twenty feet wide at an expense of \$29,293—\$15,978 of which was paid by the State.

## RUBBISH REMOVAL

By purchasing a truck especially equipped to handle rubbish it has been possible to handle all the rubbish as scheduled taking the place of four horses which were unable to successfully remove the rubbish in six days. The truck did the work in four days, the extra time being used for work on the streets.

## SPRINKLING

Due to the fact that sprinkling of streets had evolved from the application of water on main streets as of a few years ago to include the application of tarvia, calcium chloride and water together with any other heavier binder that the City might see fit to use, we abolished the so-called sprinkling tax and made appropriation for same under Street Maintenance, the appropriation necessary for application of such material as were formerly included under the head of Street Sprinkling amounted to about 1 mill of total valuation.

## TAXES

In order to take care of the sprinkling appropriation of \$10,000, and an increase of \$15,000 in our State and County taxes, some 30,000 of unpaid bills left over from 1924 and the fact that the past administration left a deficit of \$43,000, we were obliged to raise the tax rate three mills. This should have been done two years ago.

## BRIDGES

When the frost came out last spring it caved in the old abutment of the Gilman Street bridge. These abutments have always been constructed of timbers laid cross ways or crib work, and had to be replaced every eight years, consequently, we built of concrete at a cost of \$2,229.50 and feel that the present job is practically permanent.

## SEWERS

We have constructed 3,395 feet of new sewer this year, also 20 new catch basins at a cost of \$1,500.

## SNOW REMOVAL

Feeling that the light equipment used in the past to remove snow from our streets and roads was inadequate especially for

auto travel, we contracted with the Lombard Traction Engine Company to remove snow from some 45 miles of our street and county roads. I feel justified in saying that our roads are second to none in the State and has been done at a considerable less expense than formerly.

### FINANCE

In order to successfully finance the city the past year, it was necessary to promise Boston Banks to reduce our interest bearing note indebtedness, which on Jan. 3, 1925, was \$250,000. We have paid \$21,500 of our funded debt which came due this year. This subtracted from our bond issue of \$65,000, makes an increase in our funded debt of \$43,000, but our interest bearing notes have been reduced \$50,000, making a decrease in our total indebtedness of \$6,500 over that of Jan. 31, 1925.

The City Government petitioned the Public Utilities Commission to have the North Street Bridge (which is owned and maintained by the Maine Central Railroad Co.) reconstructed so that same would be safe for pedestrians and traffic. The hearings were held and plans for a new bridge were submitted by the Railroad and accepted by our Engineer and the State Highway Department.

### RECOMMENDATIONS

I strongly recommend that the City take advantage of the Five Times Appropriation Act for State Aid roads and adopt a policy of building at least two thousand feet of permanent street each year. In this way, only a few years will elapse before our streets will not only become the pride of our citizens, but a great deal less expensive to maintain.

“Hordes of Autos now remind us  
We should build our roads to stay  
And, departing, leave behind us  
Kind that rains don't wash away.

When our children pay the mortgage  
Father's made to haul their loads,  
They'll not have to ask the question,  
'Here's the bonds, but where's the roads'?”

It is very evident that something should be done to make it impossible for Land Development Companies involving the City in so much expense establishing street grades and installing sewers

in new developed areas. This work should be done by the Company who develops the land.

After the year just past, I am fully satisfied with the work of the Police Department, but am more than ever of the opinion that this Department belongs under Civil Service.

The present system in use by the Board of Assessors is inadequate and an appropriation should be made for the purpose of installing a new card system and an effort made to secure a correct valuation on all taxable property in existence.

In closing this report, I wish to thank the City Government and all City officials for their co-operation and support during the past year.

Respectfully submitted,

P. R. BAIRD, Mayor.

# Report of Police Department

---

Waterville, Maine, February 1, 1926.

To His Honor the Mayor and City Council:

Gentlemen:

I herewith respectfully submit this report of the Police Department for the year ending January 31, 1926:

## PERSONNEL OF DEPARTMENT

Franklin D. Gaskell, City Marshal  
 Alfred Poirier, Deputy Marshal  
 Albert N. Thibodeau, Deputy Marshal

## REGULAR OFFICERS

Francis Allen	Levi Leathers
George Beckett	Walter Maheu
Henry Higgins	Harry Pettie
P. H. Joyce	Joseph Violette

## SPECIAL OFFICERS (Part Time)

Ernest Cayford	Clandy Y. Strout
Charles Nichols	Edward Pooler

There are also about 85 other Special Officers.

The following is a report of the number of arrests for all causes during the past municipal year:

Arrested for out of town officer .....	2
Assault and battery .....	8
Assault with dangerous weapon .....	1
Assault on officer .....	1
Assault and robbery .....	2
Begging .....	2

Stolen money returned to owners .....	133.00
Stret lights reported out .....	46
Suicides .....	3
Talks to school children on (Traffic) .....	2
Windows found opened .....	41

There is much that could be added to this report that should be of interest to all the taxpayers. Some things of special interest must be mentioned.

Early in the season a parking system for the streets in the business section was worked out, thereby relieving the congestion, facilitating traffic, and increasing the parking facilities over sixty per cent on Main street.

In order to increase the efficiency of the Department and to prevent a repetition of breaks made early in the summer, the three platoon system was adopted in the early fall on Main street, business section. Under the old system there were fifteen hours of the twenty-four that two patrolmen were on duty, leaving nine hours with only one. Now the same section is covered by two men at all times.

In the south end of the city an additional patrolman was placed on day duty during the school vacation months. This was for the purpose of keeping order and quiet for those who work nights and must of necessity sleep days. On the flats, so called, a patrolman was placed on night duty for several months, which relieved an undesirable condition there.

A talking lamp or signal was installed at Post Office Square which helps to control traffic at that point in the absence of a traffic officer. It is felt that similar signals installed at other intersections will aid greatly in preventing accidents.

The writer strongly recommends that the Police Department be placed under Civil Service as soon as possible for the following reasons: (1) because of the waste of money in the training of new men each year or so. Several years would be required to make any group of men proficient in police work, no one would think of conducting a business proposition in a similar manner; (2) because of the uncertainty of the work we are sometimes unable to get the right type of men to enter police work, and if we do succeed in developing any of them into efficient officers, it is only a question of time before they will be discarded with the change of

✓

unloading  
zone —  
limit par  
in business  
Section —  
No break  
Flat night  
Civil Ser  
Traffic Com

administration; (3) with a change of department head each year there is no definite development program for building an efficient department.

*unc*  
*unc*  
*dy*  
The present equipment is unmodern and far below the standard for cities of this size. The writer is not recommending the immediate purchase of the following equipment, but it is nevertheless needed if the department is to function efficiently: (1) a combination ambulance and patrol to replace the truck now in use. There have been many instances during the past year when such a vehicle was needed and in one instance would have saved a life. (2) A motorcycle is needed for traffic duty and residential protection on the west side and on the outskirts of city, not covered at the present time. (3) A modern telephone signal system is needed to replace the present obsolete system which has been of little use for several years, and is now out of commission entirely. (4) An auxiliary motor unit is needed, as many times the patrol is out on duty when a hurry call comes in and the department is unable to function unless personal cars of its members are used.

During the past year the following equipment has been purchased for the patrolmen: caps, badges, twisters, traffic belts, holsters, three new guns and 500 rounds of ammunition, a spot light and signal for the patrol. The electric talking lamp installed at Post Office Square has already been mentioned.

It is sufficiently evident that the Police Department has had the confidence and whole hearted support of the Citizens of Waterville else they could not have so successfully carried out the program the past year has called for. They appreciate the confidence and support to their efforts to make this city a better and safer place in which to live and build our homes.

The public must realize that there is much to learn in regard to the several angles of police work, the suppression of crime, keeping of order, handling of traffic, and prevention of accidents. Primarily our function is to prevent rather than cure. This has been our objective.

Naturally this Department has made mistakes, coming into office handicapped in many ways, with no practical training in police work, and with inadequate equipment. This department has throughout the year striven to keep the public interest as a paramount consideration, and wishes to thank Judge Atchley, Recorder Letourneau, the city officials and county officers for their support and cooperation toward that end.

FRANKLIN D. GASKELL, City Marshal.

## City Engineer's Report

---

Waterville, January 27, 1926.

To the Honorable Mayor and City Council:  
Gentlemen:

The following is a summary of the work of this department the past year:—

### NEW SEWERS

Several important additions have been made to our sewer system the past season, as follows:

Clyde and Valley streets, from existing manhole on Clyde street to Messalonskee stream

523 feet of 18-in. tile  
2 manholes

North street from Elmwood street southerly to Sanger Ave.

464 feet of 12-in. tile  
1 manhole  
2 catchbasins

Sanger Ave. easterly from North St.

580 feet of 8-in. tile  
2 manholes  
2 catchbasins

Pleasantdale Ave.

250 feet 8-in. tile  
1 manhole

Burrill street from Messalonskee stream to Cool St. (Labor furnished by Frank Ellis).

525 feet 8-in. tile  
1 manhole

Cool street, from Burrill street easterly to residence of Ralph Berry

650 feet 8-in. tile  
3 manholes  
3 catchbasins

Donald street from Hayden brook easterly

253 feet 8-in. tile

Burleigh street, extended southerly to residence of Hugh Travers

150 feet 8-in. tile

### PAVING

The granite block paving at the end of Ticonic bridge has been extended northerly about 50 feet, 177.5 sq. yards being laid.

### BRIDGES

Early in the season it was found that the easterly abutment of the "Gilman Street Bridge" was so badly decayed as to be unsafe. As these have been renewed every 8 or 10 years it was deemed good economy to build of concrete.

Plans were immediately made for such a concrete abutment, supported on piles, to be built.

The contract for construction was let to E. Cyr & Co. of this city; 872.85 feet of spruce piling was driven, on which was built a reinforced abutment suitable to carry an iron bridge at some future time. The cost of this improvement was \$2,229.50.

"Cedar Bridge" has been replanked and other minor repairs made. It is however in very bad shape and should be rebuilt at once.

After a long delay something definite towards a new "Overhead Bridge" on North street seems to be accomplished. Several hearings have been held by the Public Utilities Commission, with the result that plans for a new steel bridge approved by the Commission, the Maine Central Railroad and the City, are on file in this office, and without doubt such a bridge will be built early this spring. These plans call for a roadway twenty feet wide in the clear, with a six foot sidewalk in addition to the above. The cost to the city will be probably about one thousand dollars.

### NEW SIDEWALKS

Owing to the large amount of new sewers necessary to be built, it was thought advisable to use as much of the available

funds as possible for the above (sewer) purposes, so a small amount has been expended for permanent new sidewalks. A new concrete sidewalk built on Lockwood street adjacent to the Crescent Hotel being about all the new work the past season. Several other sidewalks have been repaired, however.

### STATE AID HIGHWAY

During the early spring the condition of College avenue, from the upper Maine Central Railroad crossing to Highwood street was such as to make it almost impassable. Under the conditions it was deemed necessary to use the State Aid funds to improve this piece of highway.

In conjunction with the State Highway Commission a fund of five times the regular appropriation, amounting to \$29,293.00 was raised. The contract for a concrete roadway twenty feet in width was awarded to Green and Wilson of this city. Work was begun June 6th and completed Aug. 1st.

A total of 1,551.41 cubic yards of concrete was placed, and 66,060 lbs. reinforcing steel. Four new catchbasins were installed. The entire cost of this work was just within the appropriation.

### MISCELLANEOUS

A new map of the city 60 x 120 inches in size has been completed showing our entire sewer system to the present time.

This will fill a long felt want in the Street and Sewer Dept. Surveys have been made on College avenue, North street, Sanger avenue, Riverview street, Burleigh street, Cool street, Burrill street, Elm street, Western avenue, Water street, and Donald street.

### RECOMMENDATIONS

The ever increasing use of the automobile and motor truck together with the "Boom Maine" slogan is increasing the demand for better roads to such an extent that it is almost impossible to keep our highways and streets in even fair condition.

We should build a section of permanent street each year. The coming year College avenue between the Railroad crossings should be rebuilt of concrete, and Lockwood street should be paved to Main street.

Next to College avenue Silver street has the most traffic and should be put in good condition at once. It is only a matter of a short time when this street will have to be concrete the entire length.

The city should have a storage tank of not less than ten thousand gallons capacity, to store Tarvia or similar material, so that a quantity would be available whenever any street began to need resurfacing.

The abutment at the westerly end of the "Gilman Street" bridge is in bad shape and should be renewed with concrete.

"Cedar Bridge" is still in very bad shape and should be rebuilt.

As mentioned in my report of last year, a sewage system should be laid out and constructed, or construction commenced, in the Cool Street Heights section.

Something should also be done to make the Land Companies properly grade and build these streets.

I wish to thank the members of the City Council and other City Officials for their cooperation and treatment the past year.

Respectfully submitted,

E. W. CRAWFORD, City Engineer.

## City Electrician's Report

---

Waterville, Maine, Jan. 28, 1926.

To the Honorable Mayor and City Council:  
Gentlemen:

There has been installed during the year 13 additional street lights, as follows:

- 1 on Abbott street, near May street.
- 3 on Cool street.
- 1 at Edgewood and Broad streets.
- 1 on Edgewood street.
- 2 on College avenue near Colby College.
- 2 on Anne street.
- 1 on Centre place.
- 1 in Post Office square.
- 1 on Silver street near Scribner's garage.

Orders have been given for rearrangement of all lights from the Upper Crossing to Allen street. This includes several new lights.

The fire alarm system has given its usual good service the past year, with slight expense; 2,000 feet of new underground cable has been bought to be placed in the new ducts from College Place to Ash street. This did not arrive in time to be placed before the snow made the installation inadvisable until the weather is warmer. New batteries will have to be purchased soon. I would recommend the purchase of the FPI type when such purchase becomes necessary.

The police signal system is not in working condition, and will have to be rebuilt before it will ever operate economically and be reliable. We have about 2,000 feet of new wire on hand, but an entire new line (about 2½ miles) will have to be rebuilt. The boxes can be repaired and put in good shape.

There has been the usual amount of inspections the past year, and on the whole the quality of the electrical work in the city is improving.

Respectfully submitted,

E. W. CRAWFORD, City Electrician.

## Sealer of Weights and Measures

---

Waterville, Maine, February 1, 1926.

To the Honorable Mayor and City Council:  
Gentlemen:

The following is a report of the work of this department the past year:

Number of scales tested	70	Condemned	6
Number of weights tested	42	"	7
Number of dry measures tested	20	"	4
Number of liquid measures tested	57	"	10
Number of auto pumps tested	14		
Number of yard sticks tested	12		
Number of measurgraphs tested	6		

Would say in this connection that all of the work of this department for the year is not yet completed.

Would suggest that some suitable place for the apparatus of the Sealer be provided.

Respectfully submitted,

E. W. CRAWFORD, Sealer of W. and M.

# Report of Inspector of Buildings

---

Waterville, Maine, February 1, 1926.

To the Honorable Mayor and City Council:

# Report of Inspector of Plumbing

---

Waterville, Maine, Jan. 31, 1926.

To Dr. Wm. J. Young, City Health Officer:

I herewith submit my report as Inspector of Plumbing for the year ending Jan. 31, 1926.

Number of plumbers registered .....	11
Number of new permits granted .....	45
Number of tests made .....	46
Number of permits to make addition to old plumbing .....	9

## RECOMMENDATIONS

Revision of plumbing code.

Respectfully submitted,

W. D. HAINES, Plumbing Inspector.

## Report of Health Officer

---

Waterville, Maine, February 3, 1926.

To the Honorable Mayor and City Council:

Gentlemen:

Herewith is submitted a comprehensive report of the activities of this Department for the calendar year 1925. The population of the city is estimated at 15,200.

A Department of Public Health is charged with the duty of preventing disease and creating a healthy environment for the citizens of a city. In this work your Department has endeavored to strike out along lines for the good of the public. It has put itself in touch with many sources of information outside of the city and has initiated measures for the protection of the public. Rather than waiting until complaint has been made against violation, the Department has tried, and in many instances succeeded, in remedying conditions that were deleterious. It is the spirit of modern health workers to pursue this policy, anticipating conditions before such conditions are allowed to become a menace and spread disease and death in their trails.

### WATER SUPPLY

The city water supply taken from China Lake is of safe, sanitary quality and in its distribution the consumer is protected by the addition of chlorine.

### MILK SUPPLY

The enforcement of the ordinance relating to the tuberculin testing of cows producing milk delivered in the city has been enforced and as a result practically all milk used in Waterville comes from tuberculin tested herds. During year 1,700 cows furnishing milk to Waterville have been tested with no re-actors found which speaks well of the results of this work.

## GENERAL SANITATION

Collection and disposal of ashes, rubbish and industrial waste continued to be satisfactory as well as economical. Collection of garbage has been carried on by a wagon from the City Home and by people paid by this department. This method has been fairly satisfactory but everybody will not be satisfied until we have a regular municipal collection established.

## SEWAGE DISPOSAL

The sewage from the city empties into the Kennebec river and the Messalonskee stream. Warnings without number have been given that persons should not bathe in either one of these waters, yet some people still do it, as result all cases of typhoid found in the city this year have been traced to these waters. To make these waters safe all sewerage before emptying into these waters should be chlorinated.

## GENERAL CONTAGION

Referring to the chart contained in the report; it is to be noted that major contagion, such as diphtheria, scarlet-fever, have shown a decided decrease this last year. For another year we have gone through the year without a death from diphtheria. This good record has been made possible through the cooperation of the physicians of the city.

## VACCINATION

Since 1922 we have not had a single case of small-pox. This good record cannot be kept up unless every school child becomes vaccinated. In the Notre Dame and St. Francis schools on the average 400 vaccinations have been made for the past three years.

## TUBERCULOSIS

The tuberculosis cure and death rates are improving, showing the results of tuberculin testing of cattle, the supervision of tuberculosis patients by nurses, control of contact cases and the removal to the sanatorium of many of the cases.

## MARRIAGES, BIRTHS AND DEATHS

During the year 159 marriages were recorded that were performed in Waterville. An enviable record was established this

year in the birth, death and infant mortality rates. The death rate during 1925 was 10.65 per one thousand population, which is the lowest rate since the Department was established, and the birth rate 28 per one thousand. Still born numbered 17.

There was also a marked decrease in the infant mortality rate this last year. During the year there were 426 births, and the deaths of infants under one year of age was 44.36 per one thousand births. This is encouraging and shows the results of the work of the educational campaigns and the follow up work of the Department nurse.

### PRENATAL AND INFANT WELFARE

The effects of prenatal and infant welfare work continued to show results this last year. The Dept. nurse, school nurse, insurance nurse, educational work, all have a share in this wonderful result.

### CHILD HYGIENE

The concentration of large numbers of children in school offers favorable opportunity for the spread of infection, once it is introduced. It is therefore of the greatest importance that Health supervision be maintained in the schools. This work is conducted under the division of School Hygiene. In the public schools by the school physician and school nurse and in Notre Dame and St. Francis by the health officer and department nurse.

### MUNICIPAL LABORATORY

Here examinations of milk are made as regards sediment, butterfat and solids. Materials are kept on hand for the collection of diphtheria culture, tuberculosis sputum, blood and feces for typhoid.

Number of specimens examined or collected

		Negative	Positive
Milk	74		
Diphtheria culture	93	92	1
Blood for typhoid	12	6	6
Feces for typhoid	1	0	1
Smears for gonococcus	9	7	2
Blood for Wasserman	4	3	1
Sputum for T. B	12	5	7

## EDUCATION AND PUBLICITY

Ignorance and pre-conceived ideas on health matters can only be met and overcome by education. It is also true, that Public Health Work cannot progress without publicity. To this end health work has been kept before the people by moving pictures, talks in the schools and literature.

## SOCIAL DISEASE CLINIC

This clinic is free to those unable to pay a physician for treatments. In all, 17 treatments have been given for syphilis and 6 for gonorrhea, showing it still fills a place in the city's health program.

## INSPECTION

There has been made during the year inspection of barber shops, bakeries, slaughter houses, restaurants, markets, bottling works, packing houses, ice-cream plants and stores. A total of 298 food handlers' certificates were made out up to July 1st and 601 more up to December 31. All these last ones had to be approved and signed. Altogether there are 248 persons or business establishments requiring health certificates.

## COMPLAINTS

With the regular city collection of rubbish and the continued arrangement for the collection of garbage the number of complaints have been small. All complaints have been promptly attended to and needed conditions corrected.

## FUTURE HEALTH NEEDS

Through the early extension of the sewerage system, by municipal collection of garbage; by putting into execution a dental program in the schools, greater health service can be extended to the citizens of Waterville.

## CONCLUSION

The Department of Health acknowledges with appreciation the co-operation it has uniformly received from the mayor, the city

council, the school authorities, and the physicians, the various philanthropic health organizations, and to the newspapers of the city for the co-operation given this department in carrying out its health program.

Respectfully submitted,

WM. JAS. YOUNG, M. D., City Health Officer.

Following is a detailed report of the work carried on by the Department:

WATERVILLE, MAINE

BELLA PICHER, R. N., City Nurse.

## Report of City Physician

---

To the Honorable Mayor and City Council:

Gentlemen:

I herewith submit my report as City Physician for the year ending January 31, 1926:

Number of patients attended .....	55
Number of office calls .....	27
Visits to homes .....	256
Visits to City Home .....	11
Surgical operations at hospitals .....	2
Surgical operations at office .....	3
Number of births .....	8
Number of deaths .....	5
Examinations of insane .....	4

Respectfully submitted,

BLYNN O. GOODRICH, City Physician.

# Report of Assessors

---

February 1, 1926.

To the Honorable Mayor and City Council:

Following is the report of the City Assessors which the undersigned respectfully submit:

On the 1st day of July, 1925, we committed to Chester W. Getchell, Collector of Taxes, for collection, lists of taxes on polls, real estate and personal estate, subject to assessment for the year beginning April 1, 1925, as follows, to wit:

On Polls—4,442 @ \$3.00 .....	\$ 13,326 00
On Real Estate, \$11,223,810 @ 36 mills	404,057 16
On Personal, \$2,286,425 @ 36 mills ....	82,311 30
	<hr/>
	\$499,694 46

From time to time we submitted to Chester W. Getchell, Collector of Taxes, for collection a supplemental list of taxes of polls and estates subject to assessment amounting to \$1,429.20.

Following are the appropriations:

For State Tax .....	\$ 93,915 17
For County Tax .....	21,992 46
For City Tax .....	383,786 83
	<hr/>
	\$499,694 46

The present system in use by the Board of Assessors is inadequate and an appropriation should be made to enable the City Engineer to prepare a set of Assessors' Maps from which a suitable card system can be established.

The revenue from such a system would more than pay for itself in a short time.

F. J. HOLLAND,  
CHARLES F. MILLER,  
CHARLES H. PULSIFER,  
Assessors.

## Free Public Library Report

---

Waterville, Me., Feb. 1, 1926.

To the Honorable

The Mayor and The City Council:

The Trustees of the Public Library, in submitting their annual report, would at the outset pay tribute to one of their number, Frank Kingsbury Shaw, Esq., who died suddenly Jan. 18, 1926. He had served the City in several capacities, was Recorder of the Municipal Court, 1892-96; Judge of the same Court, 1897-1912; and had been engaged in the practice of law in this city for forty years; had served as a member of the Board of Education, and as Trustee of the Public Library. He discharged the duties of his Trusteeship in this Library with great fidelity, and his fellow trustees express their sorrow at his death and their sympathy with his family.

The year 1925-26 has surpassed all record in the breadth and efficiency of the work of the Library. The City is especially fortunate in its Library staff,—Miss Jennie A. Smith, Librarian, Miss Mary Tobey, Associate, and Miss Marion Tobey, Assistant Librarian. Broad culture, thorough training, expert experience, and friendly interest, enable them to give to every patron of the Library the best service which its resources can furnish. The salary of these officials should be made to correspond more nearly with those paid in other branches of educational service that require far less of preparatory training. Mr. Burns, caretaker, has performed his duties in a very satisfactory manner.

Considerable gratuitous service has been rendered by some who find the reward of their work in the library training secured and in the appreciation of the overworked librarians.

There has been great advance in the resources of the Library, more books than usual have been bought, and greater facilities are now offered for research and study as well as for entertainment, than ever before. (see report of Book Committee)

The thanks of the Board have been extended to the Waterville Woman's Club which, through the efforts of Miss Exerene Flood,

has made a very significant and valuable addition to the books on our shelves. Should other citizens, recognizing the service that the Library renders to the whole city, work as hard for it as does Miss Flood, its resources would be vastly increased.

Dr. and Mrs. Thayer remain special patrons of the Library, and thanks have been extended to them and to many others who have given books during the year.

Public spirit may well find expression in this serviceable way. There are a great many idle books in the city which would immediately become useful if given to the Public Library. Whether the public school teachers are responsible for the throngs of children and youth who come to the Library as soon as school is out, or not, everything possible is done to provide these young people with books required in their courses, to help them in looking up desired information, and for the teachers themselves, books on pedagogy and school administration have been supplied.

It is a problem how to deal helpfully with the throngs that crowd the room and more attendants may be an absolute necessity in the near future.

Special lines of work include reading courses, the story hour for children, children's book week, etc., and the supplying of business and technical books that may aid those who read with a purpose.

The Trustees would call special attention to the report of the Finance Committee. The work of the Library has greatly outgrown the appropriation for its support. No other department of public education is giving such broad service, and no other is maintained at such low cost.

The city is growing—the schools are increasing. Let the Library have a corresponding allowance, and your Trustees will be able to show even larger results. It is the City Library, and grateful for the cooperation of the Mayor and the City Council in the past, the Trustees are encouraged to believe that adequate support will be given, corresponding to constantly increasing service.

Respectfully submitted,

Per Order of the Trustees,

E. C. WHITEMORE.

## REPORT OF TREASURER—PUBLIC LIBRARY

Feb. 1, 1926

A. F. DRUMMOND, Treas.

## REPORT OF THE LIBRARIAN

To the Board of Trustees of the Waterville Public Library:

I have the honor to submit the report of the Waterville Public Library for the year ending January 31, 1926.

The statistics for the year are as follows:

Accessions	classified as follows:
Fiction .....	343
Juvenile Fiction .....	273
General works .....	22
Philosophy .....	23
Religion .....	44
Sociology .....	98
Philology .....	1
Natural Science .....	32
Useful arts .....	41
Fine Arts .....	97
Literature .....	101
Travel .....	54
Biography .....	97
Reference books .....	34
Medical books .....	31

Of these 947 were purchased, 362 were gifts, 15 acquired by binding.

## Attendance:

Reading room .....	14,077
Reference room .....	7,544
Children's room .....	14,123

Total .....	35,744
-------------	--------

## Circulation:

Adult fiction .....	27,792
Juvenile fiction .....	12,552
General works .....	599
Philosophy .....	321
Religion .....	695
Sociology .....	1,908
Philology .....	138
Natural science .....	1,021
Useful arts .....	1,300

Fine arts .....	1,159
Literature .....	3,913
Travel .....	1,352
History .....	1,438
Biography .....	1,899
Magazines .....	3,469
<hr/>	
Total .....	59,556

This is an increase over last year of 303.

The Vacation Reading Club sponsored by Loring, Short and Harmon again interested the children this year. One hundred and eight joined the club, thirty-eight read and reported on the five books necessary to secure a diploma, while twenty-six read and reported on the eight necessary to place them in competition for the prize offered by Loring, Short and Harmon to the one making the best reports. This was awarded to Edith Langlois.

The diplomas and the prize were awarded during Children's Book Week.

This week was observed at the library in November. Many books were loaned us for the occasion by Loring, Short and Harmon of Portland and the Library Book House of Springfield, Massachusetts. Fifty-two books were sold for the sum of \$69.63, of which the library received \$12.75 as profit.

Gifts of books have been received from Irving Fisher, Eldridge R. Johnson, William J. Hartford, Mrs. V. C. Totman, Miss Angelia Kalloch, Dr. F. C. Thayer, National American Woman Suffrage Association, Mrs. Carroll Perkins, Dr. E. C. Whittemore, Mrs. H. D. Bates, Miss Katherine Boutelle, Mrs. I. B. Mower, George Naufel, Waterville Woman's Club, Maine State Library, Colby College, Miss Hannah Phillips, Frank B. Philbrick, United States War Department, and William L. Palmer.

It became necessary to have a re-registration of the patrons of the library and in August this was started. Thus far the number registered is 3,205. Of these 455 are new ones.

Under the auspices of the Waterville Woman's Club Miss Exereie Flood staged a play for the benefit of the library. This meant a vast amount of work on her part, but she gave her services freely without remuneration. The play was given in the Opera House and was very successful, as is always the case with Miss Flood's work.

The proceeds turned over to the library after the larger expenses were paid amounted to \$478.37. Thus far we have spent \$288.32, all but eleven dollars of which was for books, leaving, including accrued dividends on amount deposited in a savings ac-

count, \$194.00 still on hand. We cannot be too grateful to Miss Flood for her generous efforts for the library, as well as to the Woman's Club, whose members sponsored the play and worked for its success. This is but one more item added to the many for which we have so many times been indebted to them.

A committee from the Club was appointed to select the books, and many valuable and worth while books have been secured, 143 thus far.

In line with the widespread interest at present in adult education we have availed ourselves of the courses of reading published by the American Library Association under the general title "Reading with a Purpose." Thus far courses are offered with the following subjects: "Frontiers of Knowledge," "Ears to Hear; a Guide for Music Lovers," "Biology," "English Literature," "Some Great American Books," "Ten Pivotal Figures of History," and "Sociology and Social Problems." Each course is provided with what may be called a guide book, giving information on the subject and recommending a list of books for reading.

Those books which the library lacked have been purchased for the courses, and it is hoped there will be sufficient interest in them to warrant our adding to them as they come out from month to month.

This year marks the fiftieth anniversary of the founding of the American Library Association and this is to be celebrated in October at a library conference to be held at Atlantic City and Philadelphia.

The Association was formed at Philadelphia in 1876 at the time of the one hundredth anniversary of the signing of the Declaration of Independence, and now at the one hundred and fiftieth anniversary of this event the American Library Association is to celebrate its own fiftieth anniversary.

The President says in his announcement to librarians "The main object of the observance of this Anniversary is not to 'point with pride' to past achievements of the A. L. A. The object is to bring to libraries the recognition they deserve and to aid libraries in creating a public sentiment which will make for greater achievement in the future."

Far reaching plans are being made to make this an anniversary year and not simply a celebration of a few days and to accomplish this a large amount of money must be raised, and an appeal has been made to all libraries to help.

We would like to make the suggestion that each of the trustees and each of the librarians give one dollar and that the library contribute five dollars from its fund, making in all twenty-five dollars.

If this amount is contributed we are entitled to receive a set of the A. L. A. Fiftieth Anniversary publications in a special Anniversary edition. These are the A. L. A. Catalog, 1926; two volumes of the Survey; the Report of the Commission on the Library and Adult Education; the Report of the Committee on Library Extension.

We are pleased to report already a promise of at least three dollars from the Library Department of the Woman's Club for this object.

### REPORT OF THE BOOK COMMITTEE

It becomes the sad duty of the Book Committee, officially, to report the death of Judge Frank K. Shaw, a member of your Board and of the Book Committee.

Thoroughly trained in school and college, and widely versed in the law, he served for sixteen years as Judge of the Municipal Court in Waterville, and has been for several years a member of the Book Committee. Always a reader himself, he believed in the Library, was willing to work for it, giving to it his time and his thought.

The Committee express their sorrow at the death of their Associate, and their sympathy with his family.

The task of the Book Committee is not a simple one. It must, first, provide interesting and wholesome novels for the multitude

who seek in such novels extension of life. Its educational functions require

- a. The providing for teachers and pupils in our public schools, for the teachers, books of theory and practice, and for the pupils, standard books for required reading, and suggestive books for collateral reading.
- b. A thoroughly equipped reference room for special investigation and study, provided with the latest books of facts and the progress of the world.
- c. A Reading Room, furnished with the best in the papers and magazines of today. As the larger part of the reading of most people is confined to magazines and papers, taste and selection should be educated.
- d. Children's Room. This should be supplied with the very best books, as such a room may be a great benefit or a great evil. As over 13,000 of the children of the city visited the room last year, and as the circulation of books from the room was very large, this department is certainly efficient.

The number of books added each year would seem to carry our total number on the shelves much higher than it is, but books constantly in circulation soon wear out, and the better ones must be rebound or replaced. It is of course necessary to keep the great standards in all departments of life and literature complete.

Several important books of travel, including the Carpenter books, have been added.

Additions have been made to the important music collection of the Library, 52 being the gift of Mrs. H. D. Bates, to the library of which Mr. Bates was for many years a loyal supporter and faithful trustee.

Dr. and Mrs. Thayer have, as usual, donated many books.

Progress has been made in cataloguing the books of the Thayer Medical Collection, but several of them remain uncatalogued.

The most important addition to the reference room is the Nelson encyclopedia, which, to the advantages of brief and accurate treatment of subjects, adds the advantage of continual supplements, thus keeping the encyclopedia up to date.

The Book Committee would make special reference, and with gratitude, of the invaluable help of the Waterville Woman's Club, and tenders its special thanks to Miss Exerene Flood, who by her fine production of a pay for the benefit of the Library, furnished nearly \$500 worth of helpful and important books.

Notable biographies have been added, like the Life and Letters of Walter H. Page; Life of Calvin Coolidge; Life of Lord Gray, and these have been exceedingly popular.

The diaries of George Washington in 4 large volumes are an important purchase of the year; although the life and letters of John Burroughs in 2 volumes will have more readers.

In education, lists selected by the public school teachers have been purchased, to their enthusiastic approval.

Certain books desired by the Departments of Religious Education also have been purchased.

The classification given by the librarian shows the departments to which the additions to the Library belong.

So well has the Library served the needs of the city that it has been increasingly popular, and the demands upon it multiply as the years pass. It is manifestly impossible to purchase the books which are necessary adequately to meet conditions in our growing city at anything like the small sums of money that have been available in the past. If the Library is to do the work that it is asked to do, it must have more money for books.

The thanks of the Committee have been extended to all who by their gifts have helped to supply the needs of the Library in any department.

Respectfully submitted,

E. C. WHITEMORE,  
F. C. THAYER,  
MARY S. HEATH,  
FLORENCE E. DUNN,  
CARROLL N. PERKINS,  
A. F. DRUMMOND,  
H. C. LIBBY.

## REPORT OF THE COMMITTEE ON BUILDINGS AND GROUNDS

Waterville, Maine, January 31, 1926.

To the Board of Trustees of the Waterville Free Public Library:

We herewith submit our report for the year ending January 31st, 1926. The necessary fuel for the Library building has been purchased during the year and the bills for the same have been approved and presented to the Treasurer for payment. No repairs have been made on the property during the past year other than those necessary for the proper protection of the property. It will be necessary in the coming year to have the floor at the main entrance relaid and a few other repairs made on the building, and

it's hoped that the necessary funds may be granted by the incoming City Government. Your Committee would recommend that a special appropriation of two thousand (\$2,000) dollars be asked of the City Government to be used towards placing new stacks in the Library for books.

Respectfully submitted,

LEON O. TEBBETTS,  
HORACE TRUE MUZZY,  
L. A. D'ARGY.

---

To the Trustees of the Free Public Library of the City of Waterville:

The Finance Committee herewith presents its Annual report for the year ending January 31, 1926, together with such suggestions as existing conditions appear to demand.

The books, vouchers and accounts of the Treasurer have been examined and found to be altogether correct.

As will readily be observed, by all who read the reports of the Librarian and Treasurer, and the Book Committee as well, that the ever increasing demands of the Library require larger appropriations from the City Government than ever before. Each year shows an increased number of people who make use of the facilities which the Library offers resulting in a largely augmented circulation, all of which has made imperative a larger Library force thus entailing additional cost. Last year's stipend from the City Government was six thousand five hundred dollars, two thousand five hundred dollars less than the recommendation of your Committee. We about broke even, to be sure, but only because there are still a few unpaid bills and we were compelled to use, for maintenance, a part of the appropriation which we had hoped to apply to the installation of new stacks, the demand for which still exists in a cumulative degree. We now have a special fund of one thousand nine dollars and twenty-six cents to be applied to that purpose, the total cost of which will be something above three thousand dollars. We most earnestly recommend to the City Government an appropriation of two thousand dollars for new stacks. We also respectfully request the subjoined appropriations for the coming year.

May we again further suggest that this is a ten thousand dollar business which can not be successfully conducted on a six thousand dollar basis.

## MAINTENANCE

Librarian, Assistant Librarian and extra help .....	\$3,000 00
Janitor Services .....	900 00
Fuel .....	475 00
Electric current and lamps .....	300 00
Library supplies .....	100 00
New books .....	2,000 00
Periodicals .....	300 00
Repairs, Miscellaneous Expense .....	200 00
Water Rates .....	35 00
Binding books .....	175 00

GEO. FRED TERRY,  
ORA A. MEADER,

Finance Committee.

# Street Commissioner's Report

---

Waterville, Maine, February 10, 1926.

To the Honorable Mayor and City Council,

Gentlemen:

The following is submitted as a report of the Street and Sewer Department work for the past year:

As usual, owing to the large amount of traffic, it was necessary to grade and resurface with gravel a large proportion of our streets; the following have been repaired:

Elm, Pleasant, Temple from Charles to Elm Sts., Spring, School, Winter, Park, North, Burleigh from Winter to Western Ave., Water, Silver, Winter, Summer, Terry, Sturtevant, Greenwood, Charles, Western Ave., Oakland, Maple, Upper Main, Wentworth Ct., Leighton, Front, Highwood, Nudd, Dalton, Pearl, Sherwin, Chaplin, Collins, Lockwood Sts., and County Road.

The repair of this large number of streets, and roads, required the handling and spreading of a large amount of gravel from the City Pit. No account was kept of the number of loads but it was at least as much as in former years.

The Webb Road from the River Road to Oakland Line and the Trafton Road from the Eight Rod Road to the Oakland Line were rebuilt. The remainder of the roads were graded, and smoothed as required.

About one thousand yards of gravel was furnished from the City pit for the construction of the concrete State Aid Road.

## SEWERS

New sewers have been built by this department on North and Burleigh Streets.

Three new manholes have been built; 1 on College Ave. at Maple St., 1 on Elm St. at Percival Ct., and 1 on Haviland St.

New catchbasins have been built as follows; 4 on College Ave. in connection with the State Aid Road, 1 on Kelsey St., near

# Street Commissioner's Report

---

Waterville, Maine, February 10, 1926.

To the Honorable Mayor and City Council,

Gentlemen:

The following is submitted as a report of the Street and Sewer Department work for the past year:

As usual, owing to the large amount of traffic, it was necessary to grade and resurface with gravel a large proportion of our streets; the following have been repaired:

Elm, Pleasant, Temple from Charles to Elm Sts., Spring, School, Winter, Park, North, Burleigh from Winter to Western Ave., Water, Silver, Winter, Summer, Terry, Sturtevant, Greenwood, Charles, Western Ave., Oakland, Maple, Upper Main, Wentworth Ct., Leighton, Front, Highwood, Nudd, Dalton, Pearl, Sherwin, Chaplin, Collins, Lockwood Sts., and County Road.

The repair of this large number of streets, and roads, required the handling and spreading of a large amount of gravel from the City Pit. No account was kept of the number of loads but it was at least as much as in former years.

The Webb Road from the River Road to Oakland Line and the Trafton Road from the Eight Rod Road to the Oakland Line were rebuilt. The remainder of the roads were graded, and smoothed as required.

About one thousand yards of gravel was furnished from the City pit for the construction of the concrete State Aid Road.

## SEWERS

New sewers have been built by this department on North and Burleigh Streets.

Three new manholes have been built; 1 on College Ave. at Maple St., 1 on Elm St. at Percival Ct., and 1 on Haviland St.

New catchbasins have been built as follows; 4 on College Ave. in connection with the State Aid Road, 1 on Kelsey St., near

Rowell & Gustaffason's, 1 on Charles St. near Franklin Garage, 1 on Burleigh St., near residence of Harry Webber, 1 corner of Burleigh St. and Western Ave., 1 on Lublow Ct., 1 on Sanger Ave., 1 on Oak St.

Several catchbasins have also been rebuilt or raised to grade.

### BRIDGES

The bridge at "Low Brook" was repaired early in the season. New stringers were put in and new planking placed. The bridge at the Pumping Station was replanked, as was also the Marston Bridge. Cedar Bridge was replanked and the railing repaired. This bridge is in very bad shape and must be rebuilt. 13,000 feet of planking has been used in the above repairs.

Quite a large amount of gravel was hauled as filling in connection with the building of new concrete abutment at the Gilman Street bridge.

### SPRINKLING

Owing to the change in the method of applying the sprinkling tax this year, a larger amount of sprinkling work has been done by this department than formerly.

Besides the water applied, which kept the motor sprinkler in constant use, there was applied about 23,000 gallons of Tarvia and other binders. 212,000 lbs of calcium chloride was purchased, of which about 25,000 lbs are now in stock. The extremely wet weather the latter part of the season made the keeping of the surface of the streets in proper shape impossible.

### COLLECTION OF RUBBISH

Early in the season a light truck with special constructed body was purchased for rubbish and ashes collection. A systematic collection of such materials over the City has been carried out, the work being done in four days. With teams it was almost impossible to make the collection in six days. The remaining two days of each week the rubbish truck has been able to help on the regular Street work.

### SNOW REMOVAL

The Lombard Traction Engine Co. being anxious to develop an efficient snow plowing apparatus, a contract between the City and the above Company was made for the proper breaking out of about 45 miles of our roads and streets the present winter.

They have built a plow tractor capable of plowing out a road to a width of twenty-four feet. This outfit is doing good work at a reasonable expense and keeping our roads in better shape than ever before.

A small plow has also been purchased for use on the front of the Packard Sprinkler truck. This is being used to good advantage to open the shorter and narrower streets that would not accommodate the large tractor.

### RECOMMENDATIONS

In concluding would like to offer just a few recommendations.

The City now has five motor trucks and vehicles in use by the Street Department.

Part of them are now housed in the old stable in the rear of the Fire Station. This housing is not in accordance with the Fire Code, the building is not large enough, and the Street and Fire Departments should be kept separate.

There should be built at once, a one story garage of either concrete or brick, large enough to care for our apparatus, and also to provide a place for a workshop, for repairs, not only of the trucks but of all the Department.

A good location for such a building is afforded at the lot on Wentworth Court.

The stone culvert on the Webb Road near Fred Mason's will have to be rebuilt this Spring.

Owing to the sewer construction on Cool Street late in the fall (in fact after the ground froze) this street surface is in bad shape, and will be impassable when the frost comes out. It will be necessary to reshape, roll and gravel this street to make it passable.

Respectfully submitted,

ROY L. PAGE,

Street Commissioner.

# Public School Report

---

## REPORT OF THE SUPERINTENDENT

To the Board of Education:

On the opposite page will be found a summary of the expenditures of this department for the fiscal year ending Jan. 30, 1926. The City Government allotted to this department \$170,000. It will be noted that the entire expenditures amount to \$170,547.88 showing an overdraft of \$547.88. The needs for the year just passed were very carefully considered and an appropriation of \$173,000 was asked for, which amount would have been none too large to carry on the work required. We have been obliged to practice economy to the extent of going without some much-needed books and other material (if such can be called economy) in order to keep the overdraft as small as it is. It is generally true that every department head starts out at the beginning of the fiscal year resolved to keep his particular department out of debt. However hard he may try to keep his resolution he is often forced to meet expenses that were entirely unforeseen, so beyond his control, and sure to fail if the requested budget is reduced.

From all parts of the country come complaints about the increasing tax-rates made necessary by the growing cost of government. In some cities the local situation has been made the subject of careful study by a Commission created for the purpose, but in no instance has any means been found by which any considerable reduction can be made without calling a positive halt in the city's progress. Communities demand good roads, winter and summer; they demand adequate police and fire protection, they demand good schools, housed in up-to-date school buildings, they demand protection from pestilence and disease, they are in duty bound to help those who are physically unable to help themselves: in fact, communities demand all the necessities and some luxuries and for all these communities must pay.

## NEW DISTRICT LINES

The present district lines were established years ago and at that time were wisely drawn. Due to an increase in the school

population, the introduction of kindergarten, and the opening of new residential areas, these lines do not now serve their original purpose. Adherence to them is now impossible without creating serious congestion in five of the eight elementary schools. The North Grammar, Myrtle Street and Brook Street Schools have outgrown their respective buildings: Western Ave. and Walnut Street schools will soon outgrow theirs, and the Junior High School must have more room in the not-distant future. The following method of relieving this crowded condition is suggested. Add a second story of four rooms to the Brook Street building. Discontinue the use of Holland Hall by transferring the pupils now housed there to the enlarged Brook Street schoolhouse: establish a kindergarten at Brook Street, also one fourth and one fifth grade. By this means the pressure at the North Grammar and Myrtle Street will be relieved and the sixth grade that belongs in the North Grammar building may then be taken from the Junior High and returned. This will relieve the congestion at Junior High by making available two rooms that must be had there next year. There are in the sixth grades at this writing 229 pupils. These will enter Junior High next September and to accommodate them it is absolutely necessary that more room there be provided.

In order to bring about a fairer distribution of pupils in the several buildings an additional step must be taken, that of redrawing the boundary lines of the eight elementary districts. This matter has been very carefully considered by the Principals working with the Superintendent resulting in their unanimous approval of the following boundaries:

Walnut St. All that part of Waterville north of a line beginning at the corner of College Ave. and High St. and extending the length of High St. to Main St.

Myrtle St. All that part of Waterville north of a line beginning at the corner of College Ave. and Chaplain St., extending the length of Chaplain St., to Main St., thence along Main St., to Roosevelt St. its entire length.

North Grammar. This district to be bounded by a line beginning on the westerly side of Burleigh St. extending the length of Winter St., to Elm, to Temple, to Front, to the Kennebec river, including both sides of Front St., to Chaplin St., thence to Main St., to Roosevelt St. to its end.

Brook Street. This district consists of that portion of the city bounded by a line beginning at the corner of Edgemont Ave. and Oakdale St., extending the length of Oakdale St., to North St., to Sanger Ave., to Main St., thence to Chaplin St., to College Ave., to High St. to its end.

South Grammar. This district shall comprise all that part of the city south of a line beginning at the Messalonskee stream and extending the length of Winter St., to Elm St., to Temple St., to the Kennebec river.

Western Ave. This district shall be bounded by a line beginning at the Messalonskee stream extending thence the length of Winter St., to Elm St., to Temple St., to Main St., to Silver St., thence along Silver St. to Wilson Park.

Redington St. This district shall be bounded by a line commencing at the corner of Main and Silver Sts. extending thence along Silver St., to Gold, to the Kennebec river.

Grove St. All that portion of the city south of a line beginning at the Kennebec river and extending the length of Gold St., to Silver St., thence to Wilson Park including the district known as Nelson Heights.

It is not expected that these new districts will meet with the unanimous approval of all concerned but it is claimed that they will result in a much fairer distribution of pupils among the several schools and in the long run will serve the greatest good to the greatest number.

The districts as outlined in the preceding paragraph will, if adopted, suit only the immediate needs of the department. Sometime, and not many years hence, it may be advisable to wipe out the dividing line between the Redington and Grove St. Schools, dispose of both these buildings and in place of them erect a large brick primary building to accommodate all the lower grades in this enlarged district. Just where to locate such a building is a matter for future determination. Again, it may and probably will become necessary to erect a modern building to take the place of the Western Ave. school, either on the present site or else farther out on the same street. In the three buildings just mentioned the cost of up-keep is increasing yearly. The toilet facilities in each are wholly outfit and really ought to be replaced by modern sanitary plumbing. Ventilation exists in name only and the wiring of these buildings will not bear very close inspection. This may not be considered by some an opportune time to suggest a building program but it is a fact it is none too early to begin to plan for these future needs. The subject is not one of our own seeking but one that is steadily forcing itself upon our attention. It is a matter that reaches into the pocket of every tax-payer and should have his earnest consideration.

10

## TEACHERS AND METHODS

In large measure the success of any school system depends upon the teachers and their methods of instruction and discipline.

Teachers, by virtue of their position are daily in the public eye consequently should see to it that their every act, in school or out, will bear public inspection. A community has every right to demand of its teachers that they teach by both precept and example. The teacher whose only aim is to train intellect is a failure and should seek other work. Success in teaching depends upon personality, professional spirit, ability to direct the thought of others and ability to control others and every teacher may be fairly judged upon these four points. When it comes to judging methods many of us are prone to judge on the basis of methods employed in our own school days forgetting that times have changed and that methods have changed too. Time was when every child had a book and committed portions of it to memory day by day with a view to repeating it later in the recitation. Nowadays the best teachers do not rely so much on the book but more on the later method which means teaching children to observe and infer, to reason from cause to effect. Judged by the old-time method the best pupil was the one gifted with the best memory. Ranking by the later methods, highest honors go to the best thinker.

In this discussion we must not lose sight of the rights of the teacher. She is entirely justified in expecting the home to fulfill its duty which is more than clothing and feeding its children. Education, like Charity, begins at home. Home education means providing spiritual, moral, physical and intellectual training and deserves more parental attention than it gets in many instances. The home has all the child's time during his earliest years, the time when many of the most abiding impressions are made and many life-long habits are established. Then the school takes him to supplement and enlarge the work already begun, therefore, between the home and the school there should exist the closest cooperation and good will. It is the duty of the parent to know what the school is doing for his child and how it is doing it, getting this knowledge by actual observation and not by the "They say" method nor through the reports carried home by little children. Many doubts that exist would be cleared up and an entirely different impression gained in many cases if first-hand rather than second-hand knowledge of the facts were sought. The presence of visitors is invited and will be cordially welcomed at all times.

The change in methods of discipline is quite as marked. Time was when the birch rod, ably wielded, was the important factor in maintaining an orderly school. But now the true teacher aims to know the pupil intimately, seeks some knowledge of his home environment, of his habits, of his associates, of his ambitions, and knowing these is in a position to better understand her pupil, to appeal to his sense of right and justice, thereby gaining his coop-

eration in maintaining the discipline of the school. The right to use corporal punishment is still justly given the teacher because now and then all other methods of discipline fail, but a true teacher will take advantage of this right only as a last resort.

## EDUCATION AND INDUSTRY

Approximately one fourth of our population is engaged in manufacturing in the industrial plants in and near the city. Certain it is that a considerable number of our pupils will follow in the footsteps of their elders. Why then should we not provide for these pupils some elementary training along industrial lines? Thus far we have laid great stress on academic subjects (and very properly so) but why not lay some stress on shop subjects? Is it not fair that the pupil who goes from school to the factory should be as well prepared as the one who goes from school to college? Something akin to this thought must have been in the minds of those who built the Junior High School for they provided a room to be known as the "textile room" and through the courtesy of the Lockwood Company a loom was placed there. Very recently, Mr. Quinton, the Agent of the Lockwood Mills has kindly offered to assist in further equipping this room to the end that it may become actually used in textile instruction. An elementary course may well find a place in the Junior High School, said course to be supplemented by some actual work in the mill for which the pupil should receive credit. Such a plan is already in operation in a number of cities in other states and in Sanford in this state. It could be introduced here in Waterville with the assurance that it would prove a mutual benefit to the employer and the employed.

Our nearest approach to anything in the nature of vocational education is now offered in the manual training, auto mechanics and home economics courses. The reports of the instructors in these several departments are presented herewith.

### REPORT OF THE INSTRUCTOR OF MANUAL TRAINING

To the Superintendent of Schools and the Board of Education.  
Gentlemen:

I herewith submit a report of the work done in the Manual Training Department for 1925-1926.

Owing to the multitude of Vocational Educational schemes that have sprung up since 1918, only to fade away again, a great confusion exists in regard to this work, and I am going to take this opportunity to explain briefly the aims and work of my department.

Manual Training is a State Aided special subject under the supervision of the State Department of Vocational Education. While it deals with the pupils of both the Grammar and High School it is not properly a part of either system.

To date, no system of Vocational or Trade Education has been devised that is applicable to this state. Manual Training provides a wealth of experiences, produces general dexterity and tends to formulate habits that are of great value in all skilled trades and professions. It is a preparation for the future without presuming to decide or influence the pupil's selection of a life work. The boy is the paramount consideration and success is registered by the amount of individual improvement rather than by the excellence of the finished project.

This year the subject is compulsory in the Junior class and elective in the Middle class. Only Seniors in the Commercial and English courses can take the work and to them it is compulsory either as Manual Training or Automobile Repairing. The enrollment totals about 160 boys and the schedule is as follows:

CLASS	Divisions	Classes		Minutes		Total	Minimum
		Per Week	Per Class	Auto Repair	Per Week		
Juniors	5	1	40	40	80		
Middle	4	3	80	80	240		
						320	300 For Grades
Seniors	1	5	80	.	400	180	For High Sch.

Note. Middle class have a half year each of Manual Training and Automobile repairing.

With the exception of the earliest problems, the choice of work is limited only by the ability of the boy and the time available. Any worthy object within the capabilities of the pupil that will serve to introduce a sufficient number of tools or exercises may be elected. The coathanger, bread-board, book-ends, bookcase, taboret, table, cedar chest, piano bench, and lamps are typical examples of the products of this department.

Most of the articles made are intended for use in the home, therefore, instructively call forth the best efforts of the boy. The cooperation of parents in this respect is most gratifying and it contributes in no small way to the success of our work.

In addition to the regular work the boys have made athletic equipment, sign boards and various other objects for the school.

The Senior class hung the curtain in the auditorium and much of this work was done after school hours. A certain amount of this work is most desirable. Repairs seldom are of real educational value to boys of this age and therefore should be avoided.

A supply of Ash, Cherry, Chestnut, Gum, Mahogany, Maple, Oak, Pine, Walnut, White wood, three ply Birch and a few pieces of rare woods for inlays are regularly kept on hand. Other lumber, panels and appendages are ordered as required. The projects, finish, refinishing and home repairs enrich the course with a great many materials and operations.

The present system of obtaining supplies for Manual Training requires that all materials be designated to the Principal of the Junior High School who in turn requisitions the Superintendent of Schools for the purchase of same. They are then offered to the pupils at approximate cost.

The boy makes a sketch of his problem from which a "Bill of Material" is drafted and the cost is estimated. This Bill of Material is submitted to the parents for approval when it totals fifty cents or more. The element of expense is often the determining factor in the selection of work. The Instructor, therefore, makes every effort to acquire the necessary articles at the very lowest price in order that the making of larger and better projects may be encouraged without materially increasing the cost of this department. However, it has never been the policy of the Board of Education to fully recover the expenditures for supplies.

The room contains sixteen benches with the regular tools, a large general equipment, tool room, finishing room, metal working bench, lathe, band saw, jointer, circular saw and a 24-in. single surfacer.

The surfacer was installed in October. It is an excellent machine and fills a long felt need. We are now able to complete all ordinary articles in our own shop and to purchase lumber in the rough which is a great advantage. The operation, adjustment and upkeep of this tool affords rare practice and brings many new principles of machine design under the observation of the class.

A permit signed by the parents is required before a boy is allowed to regularly operate the machines of this department, and I am pleased to say this permission is rarely denied. Since these same machines in a smaller form have become common in the home workshop, the element of safety alone would justify some training along this line.

I beg to present the following recommendations for your consideration:

1. That the time allowed the Junior class be increased to at least one hour, and that classes be limited to sixteen pupils.

2. That some method be devised to enable the Seniors to elect Manual Training without seriously interfering with their courses.

3. That the "Grinding Attachment" omitted when the "Surfacer" was ordered be purchased.

Respectfully submitted,

JOHN P. EAGAN, Instructor of Manual Training.

---

To the Superintendent of Schools and the Board of Education:

The following is a brief report of the Auto Mechanics course including the projects introduced thus far in the new course of Home Mechanics for the seventh grade boys.

The classes this year have been large, considering the room available for Auto Mechanics work. It is felt that not over twelve boys can be handled to the best advantage in a class.

When the present instructor entered the employ of the city he brought to the school a car which has been worked on when no other cars were available. It is felt that the city should purchase one or more chassis for this purpose. In the shop at present, are four cars of different makes. Two of these have been completely dismantled and reassembled with new parts replacing worn or broken parts and the expense of these being borne by the owners of the cars.

Questionnaires that have been given to the boys during the year seem to indicate that the boys would like more electrical and machine work. Before much of this work can be done the present equipment should be supplemented with an acetylene torch with a lead burning attachment and welding head, also a lathe. The instructor would recommend one of the New South Bend lathes built especially for projects of the school. With this equipment we would be better able to give boys an understanding of mechanical work.

The Home Mechanics course as the name indicates takes up projects found by the average man around the home. The course includes tying of knots, soldering, glass cutting, meter reading, threading nuts and bolts, filing, a study of different metals and their uses, copper plating, riveting concrete work, use of Plaster of Paris for patching walls, bell wiring, etc.

The divisions of the Junior Class have been very large and with the limited space, they work at a disadvantage. If the room

designed as a Science Laboratory but now used as a class room were available and properly equipped it could be used jointly with the Science Department to the betterment of both courses.

LEON BROWN, Instructor.

---

## REPORT OF HOME ECONOMIC DEPARTMENT

The work in this department is somewhat different than it has been in previous years.

The Juniors have a single period (40 Min.) of sewing and a single period of household science each week. This short period plan we have found very unsatisfactory. As this type of work requires a double period, we have been unable to teach cooking and have substituted household science. In this course we aim:

1. To develop an interest in good housekeeping.
2. To develop an appreciation of home activities.
3. To arouse a desire for healthy living.
4. To arouse a desire for neatness as to home and person.
5. To teach economy in the use of food and fuel.

In the sewing department the aim is to create a liking for this type of work and develop a skill and knowledge in handling of necessary tools. The work consists of making a cooking uniform.

The Middles have a double period three times a week. For twelve weeks they take cooking. In this grade we aim:

1. To enable girls to prepare and serve typical foods and palatable, simple nourishing dishes.
2. To develop a knowledge of foods as to production, selection, care, cost and use to the body.
3. To teach good manners and table etiquette.

This year they served a dinner to the editors of the school paper at a cost of twenty-nine cents per plate.

For six weeks we take up cleaning and household management. Visits are made to stores to see vacuum cleaners, etc., and also to the bakery. The remainder of the year is devoted to work in the

sewing department, which consists of making a set of underclothing, some kind of handwork, budgets and some simple problem in home decoration. The aim of this work is chiefly to teach the care and repair of clothing, garment construction, and to help the child to realize some of the responsibility connected with the family income.

The Seniors have had, and ought to have, a double period each day of the week, but this year they have half that amount of time, which is a great disadvantage. Their work consists of:

Home Hygiene and Care of the Sick.

Laundry

Textiles

Sewing

Clothing Selection

Handwork.

The Hygiene includes:

Personal Hygiene

Care of the Sick

First Aid

Bandaging

Care of Children.

I think a great deal of benefit has been derived from this course as many gratifying reports have come to us. The baby books which the girls made were given to the Little Wanderers' Home.

The classes in laundry work have made visits to the stores seeing different types of washing machines, and also to the laundry. This year the Waterville Steam Laundry has offered us a prize of five dollars to the girl who writes the best essay, on what she sees while going through the establishment.

The sewing begins with a review of some problem in construction and drafting of a simple pattern, making over of garments and a project along tailored lines such as middy blouse or tailored waist.

In the textile work the principle fibers are studied and a visit to the mills is made from which a great deal of benefit has been derived.

When discussing the principles of clothing selection the individual girl is studied in regard to color, lines and suitability of certain garments as to her individual type.

The handwork consists of certain kinds of embroidery, drawn-work, stencil or blockprint, such as the student may choose.

In previous years time has been spent on budgets and home furnishings but this year it is impossible to cover this work.

We are greatly in need of reference books.

An oven heat regulator, for our gas range.  
A bed for practice work, as we now have to hire one.  
A skirt marker.  
A cupboard in which to hang garments under construction.  
A sewing screen.  
A sewing machine.

EULA M. SKINNER.

---

### SENIOR AND JUNIOR HIGH SCHOOLS

With the beginning of the school year last September some few changes in the courses pursued in these two schools were inaugurated. They have proved beneficial thus far. In addition to the suggestion already made regarding vocational education in the Junior High it may be well to consider the value of a good course in drawing as an elective in both schools. Upon first thought this may not appeal very strongly but after considering it from a variety of angles it will appear in a different light. There are departments in every one of the industrial plants in this city in which some knowledge of mechanical drawing is essential. Aside from this there are many occasions in the experience of an ordinary individual when the ability to express an idea by means of drawing or to read a blue print would be a positive advantage. There is hardly a subject in the curriculum that could not be better taught consequently better understood by being correlated with drawing. Especially is this true of manual training, shop work, home economics, science, arithmetic and geography. Drawing as we now offer it has a value but it offers very little by way of preparing our pupils for making any practical use of it after leaving school.

Our Junior High School has not yet passed the experimental stage. It still offers many problems that can be solved only through time and experience. A fine school spirit exists there among teachers and pupils, a spirit that aids greatly in the administration of affairs. The school spirit at the Senior High school shows a marked improvement but still falls short of what it should be. In so far as athletics are concerned the school spirit is as good as in the average high school but in other directions there is yet room for improvement. The reports of the Principals of these schools are here presented for your consideration.

To the Superintendent of Schools and the Board of Education:

I herewith submit my report for the Senior High School for the fiscal year ending January 29, 1926.

### ENROLLMENT AND COURSES OF STUDY

As in the past, four courses of study are offered at the Senior High School—Scientific, Classical, Commercial and General. The first two prepare students for college and if their work is of a sufficient high standard they are admitted to most colleges without entrance examinations. Enrollment by courses and by classes is as follows:

	Scientific	Classical	Commercial	General	Totals
Junior boys . . . . .	42	15	8	1	66
Junior girls . . . . .	4	15	30		49
Middle boys . . . . .	36	9	6	5	56
Middle girls . . . . .	3	19	34	4	60
Senior boys . . . . .	27	7	3	4	41
Senior girls . . . . .	1	17	20	2	40
Post graduate (boy) . . . . .	1				1
Totals . . . . .	114	82	101	16	313

Of this number 32.26% are enrolled in the Commercial course, 36.42% in the Scientific, 26.19% in the Classical and only 5.11% in the General. This is the first time in several years that the Commercial course has not had the greatest percentage of the school enrollment. Present facilities at the Senior High School do not permit as wide a range of subjects as are taught at the Junior High School and hence we are not able to make the General Course as attractive or as practical as we should like to have it. The vocational courses should be carried a step farther and boys and girls who do not intend to go any farther than the Senior High School would benefit by having an opportunity to study advanced practical subjects. Since only 16 students have been enrolled in the General course it would seem best to discontinue it and to concentrate on the other three. Requiring all students to study American History and Civics has proved to be a wise move—the teaching of a subject which influences young people to become good citizens and to perpetuate the spirit of democracy is indeed one of the fundamentals of a secondary school education. Of the last year's graduating class numbering 83 students, 17 entered college, 3 entered normal schools, 6 have enrolled at schools where advanced subjects are taught and 2 are engaged in teaching school.

## ATTENDANCE

The registration at the end of the fall term was 302 and the total registration for the term was 313; the average attendance for the entire term was 298.6 which is quite gratifying. The majority of the students realize that the loss of a single session of school represents a distinct personal loss to them and that they should strive to attain a perfect attendance record unless detained at home by illness. The matter of tardiness has caused us much concern this year and it is my hope that parents will cooperate with us in having their children punctual by starting them from home on time.

## RANK CARDS AND SCHOLARSHIP

We are using the same system of marking that has been in use for the past seven years—"1"—95 to 100%; "2"—85 to 94%; "3"—70 to 84%; and "4" below 70% and not passable. The certification mark of the school for college entrance is 85%. Rank cards are issued during the week following the close of each six-week period. It is desired that parents take more interest in their children's progress as expressed through this medium; low marks should be investigated and a conference arranged with the principal. In order that no confusion may arise over the possibility of a student being promoted at the end of the school year, parents are asked to have their children make up any deficiencies as soon as possible following any failure. The average boy or girl should spend at least two hours in home study if he is to get the most out of his school work; failure to spend a reasonable amount of time in studying at home always results in low marks and quite often, failures.

## SCHOOL ACTIVITIES AND SOCIAL LIFE

The social life of young people demands our active cooperation with these same children and by offering our encouragement and help we are doing much toward making them better citizens. Parents who have visited the school this year have been loud in their praise of the work accomplished by the various clubs and by the teachers who have acted as student advisors. These same clubs have been instrumental in promoting a better feeling throughout the school and the possibilities are unlimited. We aim to have more of the parents come to our sociables, debates and entertainments in order that they may see what we are trying to do for our future citizens.

While there is no definite schedule for school sociables, we plan to have them during such parts of the school year as the school life may seem monotonous and weather conditions are unsuitable for out-of-door recreation. Some of the most noteworthy events on our social calendar are the annual school play, interclass and interscholastic debates (which are public), entertainments by the various school clubs and the public appearances of the school band and orchestra. Of the latter organizations, not too much can be said in praise of their work and I believe that more time should be spent in the study and practice of music, not only instrumental, but choral and vocal as well. Since the music used at the Senior High School is of the better type, it has both a cultural and educational value.

### ATHLETICS

Athletics do, and should, occupy a prominent place in any well established secondary school; the reasons for their existence are many. So long as they are not featured at the expense of the ethical standards of the school the benefits will be far-reaching and of considerable value. At the Senior High School we have tried to establish our athletics on a high plane and to make them beneficial to as many of the students as possible. Good sportsmanship and fair play are not only encouraged but demanded.

The football team enjoyed its most successful season in many years, meeting with only one defeat and that at the hands of a preparatory school. While the basketball teams have not been as victorious, they accept defeat in a gracious manner. One of the best ways to advertise our city is by sending a well-trained and well-equipped team of boys or girls to another city or town and there give them an opportunity to display the brand of physical and moral courage that we try to develop.

We were greatly pleased to learn that the Chamber of Commerce has taken steps to provide an athletic field for the use of High School teams, something which is very much needed at the present time by both of the High schools. It is absolutely impossible to arrange a baseball or football schedule that will not conflict with the Colby or Coburn schedules and since we are dependent upon these two institutions for the use of their fields we are unable to stage home games on the most desirable dates or at the most opportune times.

### BUILDING AND GROUNDS

The building is in very good condition at the present time—the only repairs of consequence consist of tinting the walls and

ceilings of some of the rooms that have been stained by water that has leaked through the roof. The installation of window strips on the north and west side of the building would effect a great saving in coal and add much to the comfort of the occupants of these rooms. More space is needed in the boys' and girls' dressing rooms in the basement and the removal of a part of the toilets there will remedy this condition. The flagpole, located on the roof, is not in a position which is readily accessible—in order to display the flag it is necessary to both raise and lower it from the top of the building. The fence that encloses the tennis court has been completely demolished through the agency of decay and storms and should be replaced this spring.

In closing, I want to comment on the fine school spirit that has been in evidence this year at the Senior High School. The students are supporting every activity in a way that is encouraging and have taken great pride in their school as an integral factor in this community. Visitors have been generous in their praise and we hope that more parents and citizens will become interested in our work and become more closely associated with the school in every way possible.

I want to thank the Board of Education for the consideration it has accorded our school and for the generous cooperative attitude it has taken.

NORMAN L. MATHEWS, Principal.

---

To the Superintendent of Schools and Board of Education:

I herewith submit my report of the Waterville Junior High School for the year ending Jan. 22, 1926.

#### ENROLLMENT

Junior Class .....	149
Middle Class .....	188
Senior Class .....	175
<hr/>	
Total .....	512
Sixth Grade .....	67
Number of Pupils in building .....	579

As a result of the development of a Course of Study for the boys and girls of the Waterville Junior High School, it seems fitting

at this time to publish the results. The following course is being followed this year, and only minor changes if any, are contemplated for next year.

### JUNIOR CLASS

(Required of all Students)

English, including

Oral and Written Composition, Spelling, Technical Grammar, Literature, and General Language as a basis for the later study of Foreign Languages.

Mathematics

Social Science, including

Geography and American History

Manual or Household Arts

Drawing, Music and Penmanship

### MIDDLE CLASS

(Required of all Students)

English, including

Oral and Written Composition, Spelling, Technical Grammar, Literature

Mathematics, including

Beginning of Algebra in latter half of the Year

Social Science, including

Geography, American History, and Civics

General Science

Drawing, Music and Penmanship

(Subjects that may be elected)

French

Latin, in latter half of the year

Manual Arts, including

Woodworking and Auto Mechanics

Home Economics, including

Sewing, Cooking, Household Appliances, Home Decorating and Budgeting.

## SENIOR CLASS

(Students are required to elect one of the following courses)

Classical	Scientific	Commercial	English
English	English	English	English
Mathematics	Mathematics	C. Arithmetic	Arithmetic
Ancient Hist'y	Ancient Hist'y	C. Geography	Community Civ.
French	French	Penmanship	Woodworking
Latin	Gen'l Science	Woodworking	or
		or	Auto Mechanics
		Auto Mechanics	or
		or	Home Ec'n'mics
		Home Ec'n'mics	

All members of the Senior Class are required to study Drawing and may elect Music.

The principal change during the past year has been in the reorganization of the Foreign Language course. This course has been greatly strengthened by the study of General Language in the Junior Class in connection with the English work. The beginning of the study of French in the Middle Class instead of in the Junior class and the study of Latin in the latter half of the Middle year rather than at the beginning.

The General Course has been replaced by an English Course, and a definite place established in both the Commercial and English Courses for Home Economics and Manual Arts.

The entering class last September was not as large as was anticipated, so that the enrollment of the school is slightly smaller than last year. But the size of the sixth grade in the several Grammar schools indicates a record entering class for next fall.

Because of the need of the regular classrooms for Junior High School activities, and of the congestion in the North Grammar district, two rooms in the basement have been fitted up as classrooms to take care of the sixth grade from that school. When the building was erected one of the rooms was intended for a Textile Room and the other as a Science Laboratory. It is hoped that these rooms may be put to the use for which they were intended as soon as the congestion of the grammar districts can be remedied.

Much of the equipment asked for in previous years has been supplied. The election of a sub-master to the Faculty of the school, has made possible not only more effective administration, but also enlarged athletic activities for the boys of the school.

During the fall an interclass track meet was held, and during the winter both boys and girls are playing schedules of games with

outside teams. Whether or not baseball can be fostered as a school sport will depend upon the securing of a field for practice.

The curtain purchased jointly by the School and the School Department adds a great deal to the attractiveness of the Auditorium and its usefulness, both for School functions and for Community entertainments.

In closing this report, the Principal wishes to thank the Superintendent of Schools, members of the Board of Education, and citizens of Waterville, for the support and encouragement given during the past year.

NEAL C. MERRILL, Principal.

---

## REGISTRATION AND ATTENDANCE

Reference to the Table of Registration shows a total of 2,436 pupils enrolled, a gain over last year of 217. In addition to this number in the public school there are 1,399 residents of the city in attendance at private institutions exclusive of Colby. This makes a total school population of 3,835. The attendance in the public schools is good on the whole. There is some tendency however, to allow children to stay out for trivial reasons. Parents who have the good of the schools at heart should make every effort to see that their children are regular in attendance because a portion of the school fund received from the state is based on aggregate attendance. Closely related is the matter of the school census. Every possible effort to secure an accurate census should be made bearing in mind that three dollars is received from the State for every resident between five and twenty-one years of age whether or not in attendance at school. During the month of April the census taker is supposed to call at every residence within the limits of the city for the purpose of listing all within the ages stated above. No name should be withheld: furthermore if by any chance he should fail to call at any home some one there should report the desired information to the office of the School Department which is open every school day from 8 A. M. to 12 and from 1.15 P. M. to 5 o'clock.

## REPORTS

Your attention is called to the following reports each of which contains information that is of real interest to every tax-payer.

## MUSIC DEPARTMENT

To the Superintendent and Board of Education:

I herein submit my report for the Music Department for the year ending January twenty-second, 1926.

During the year the grades have been visited bi-weekly twenty minutes being allotted each primary grade and thirty minutes to each of the elementary grades.

One day each week has been devoted to the Junior High School covering orchestral and chorus work. There are two divisions in each class, making six chorus groups. The orchestra is composed of sixteen members, at present, more enlisting as their advancement in the study of instrumental music warrants.

At the Senior High School the Band meets weekly, Wednesday mornings at eight fifteen. There are thirty members in this organization. We believe that creditable work is being done. Due to the active interest taken in the Band by the Kiwanis Club, the boys are now in uniform.

The chorus at the Senior High School meets at eleven fifteen on Wednesdays, weekly, for a half hour. This period is now given over to the Senior Graduation Music. This same period on Thursdays is given to the Senior High School Orchestra. As this time is wholly insufficient the orchestra meets for a half hour before school on the same morning. The new time schedule at the Senior High School has made it very difficult, if not impossible, to accomplish the work demanded by school activities in a proper manner.

The following is a brief resume of the special activities in this department:

February 1925, Operetta, "What's the Matter with Sally?" held at Junior High school for benefit of Band. Ninety dollars was realized which was the start of our Band fund and from which two instruments have been purchased this year to fill a long felt need. These instruments were a Baritone at \$35.00 and an Alto at \$20.00.

February, 1925, Band rendered services at City Boys' Club during Woman's Club Convention and received \$5.00 therefor.

March, 1925, Junior Reading at Junior High School. Orchestra participated furnishing music for the program.

May, 1925, Orchestra prepared a concert and held same at Junior High School for the purpose of defraying expenses to the New England Band and Orchestra Conclave at Boston. Two hundred sixty dollars was realized. This concert was also backed by the Kiwanis Club and the deficit in expense to Boston was supplied by that Club. Without their whole hearted support the trip would have been impossible. The Orchestra played in the Boston Arena on May 9th in competition with thirty or more New Eng-

land orchestras and was fortunate enough to receive the first award of the Conclave.

June, 1925, both Senior and Junior High School Orchestras and Choruses took part in their respective graduations. At the Senior High school graduation exercises in the City Opera House, the orchestra rendered three selections. Two selections from the chorus of ninety voices. At the Junior High School exercises the Junior orchestra gave three selections and the Junior chorus of one hundred twenty-five voices sang twice.

November, 1925, Armistice Day Parade in which the Band participated. In the same month the Band took part in the Kiwanis Midnight Revue at which time the necessary money was raised for uniforming the members of the band. During Education week observed in the same month the Senior High School orchestra furnished music for the public rally held at Junior High School.

December, 1925, Junior High School Orchestra assisted at the reception given Dr. A. O. Thomas, at the Junior High School.

We are preparing the Senior High School Orchestra for the Annual School play and the Junior High School Orchestra for an Operetta, the proceeds from which are to purchase assembly song books for the Junior High school.

Recommendations: The supervisor to have an assistant trained in public school music work to handle, solely, the grades. The supervisor could then devote his time to the work in the high schools which fully justifies the effort. This would serve to elevate the vocal music in the grades to a plane with the instrumental music in the high schools. It would also ultimately benefit all music work in the high schools thru better preparation. This system is in vogue in many cities and I feel that it is absolutely necessary in Waterville in order to carry on the work of this department properly. At present the ground is too great to be covered by one person and the supervisor, with special training, should take the work in the two high schools where it is most needed.

The vocal work at the Junior High School this year is not satisfactory due to the present system and the arrangement of music classes there is not conducive to improvement.

I recommend for the Junior High School: (1) a girls' glee club; (2) a boys' glee club; (3) a chorus. None of these to contain more than forty members, membership in one to be conclusive. This would give groups which could be handled in a satisfactory manner, rather than an attempt to deal with classes of seventy-five to one hundred as now exists; (4) one twenty-minute period weekly for assembly singing and music appreciation for the school.

I recommend for the Senior High School: (1) Glee Club; (2) Voice culture; (3) Music appreciation; (4) Assembly singing. The present chorus is not satisfactory because after the testing of the voices the chorus receives approximately six periods. After that the period has to be given over to the Senior class, for commencement music. Many of the pupils are to take the study of music seriously and need the voice culture and music appreciation.

Assembly singing in both schools would do much for unifying the student bodies,—in creating a school spirit. The spirit is there and needs but a touch of some common effort, meaning mutual endeavor, to bring it out. Music is a universal language and experience shows its success in unifying. The chorus singing during the war for the purpose of creating a community spirit is an example. This is particularly true of younger people.

The department wishes to thank all those who have so generously cooperated with it during the past year with particular appreciation expressed to the Kiwanis Club for its invaluable support to the endeavors of the Senior High School music organizations.

Respectfully submitted,

(MRS.) DOROTHY H. MARDEN.

---

To the Supt of Schools:

I am submitting to you my fifth annual report as Supervisor of Writing in the Waterville Public schools.

The necessity of teaching writing in the public schools is being emphasized more today than ever before. Educators are realizing to a greater extent that good practical handwriting is of vital importance in the educational training of young people.

My aim in penmanship for the past year, as formerly, has been to teach the pupils how to write at all times, a hand that should embody the four essentials; legibility, rapidity, ease and endurance.

In many rooms, classes have been made to realize that carelessly written papers lower their standing in subjects such as language and spelling. The application of the movement in the majority of classes is commendable for which the classroom teacher deserves due credit.

It is urgent therefore that teachers qualify as penmen because children are born imitators. About 75% of our teachers already hold Palmer Penmanship Teachers' Certificates.

Every year great enthusiasm is shown in preparation for awards. Following are the results at the close of the school year in June, 1925:

Business and High School Certificates . . . . .	7
Final Certificates . . . . .	43
Improvement Certificates . . . . .	66
Progress Pins . . . . .	248
Palmer Buttons . . . . .	182
Silver Star Buttons . . . . .	305
<hr/>	
Total awards . . . . .	851

This shows an increase of 320 over last year.

Respectfully submitted,

DORA M. LIBBY, Supervisor of Writing.

Waterville, Me., 1925-1926.

---

Mr. C. E. Glover, Supt. of Schools, Waterville, Maine:

I herewith submit my report as School Physician of the Public Schools of Waterville, Maine.

At the opening of the school year all of the teachers were examined for defects which might prove a menace to the health of their pupils.

Every pupil coming here from other towns to become pupils in the schools of the City of Waterville, have been given a thorough examination in my office before they have been allowed to enroll in the schools of this city.

As soon as the pupils were established in the various school homes, each building was visited, in company with the school nurse and every child was examined.

A new system has been instituted this year. Every pupil has been given a thorough physical examination by myself and the school nurse, rather than having the examination extend over a length of time and the child being partially examined by the physician, partially by the nurse, and partially by the teacher. The pupil is first accurately weighed and measured, his vision is tested, his hearing is tested, inspection of the teeth is made, followed by examination of the throat; inspection is then made for any deformities.

A complete record of all the findings is kept on individual cards which also contain a brief history of all contagious diseases. These cards are so arranged that they carry the pupil's physical record through from kindergarten until the time he graduates from high school, in a similar manner to the scholastic record.

Notification of all defects are sent to the parents on regulation cards provided by the state. Notices have been sent out covering over three hundred cases of hypertrophied tonsils and adenoids, about the same number of defective teeth, and about two hundred cases of defective vision.

A particular attempt has been made to have all cases of squint, or so called "cross eye," corrected, either by refraction or operation. It is of paramount importance to have this done early in life or vision in one eye soon becomes permanently lost.

The School Board recently made a ruling whereby all pupils participating in school athletic events must be physically fit. Since that time a great many of them have presented themselves to me for examination. Certificates have been issued to all who have been found in proper physical condition.

To enlarge and improve upon the system introduced by my predecessor has been my purpose. At the present time the public health work in the schools ranks higher than the standards in average cities of fifteen to thirty thousand population, as shown by a recent report of the Department of the Interior of the Bureau of Education.

In bringing this report to a close, I wish to express my appreciation for the splendid cooperation on the part of the School Nurse, Principals of the different schools, and to the Superintendent of Schools.

BLYNN O. GOODRICH, M. D., School Physician.

---

Mr. C. E. Glover,  
Supt. of Schools:

I hereby submit my report as school nurse for the fiscal year ending Jan. 25, 1926.

The place of the school nurse in the community has undergone a change in the last few years. At first she was looked upon as a fad but today she is looked upon as a necessary advisor by teachers, pupils and parents.

Home visits were made in the case where the child was absent from school two or three days, this doing much to minimize epidemics.

Attention was given to pupils who were unable to secure tooth brushes and paste; fifty tooth brushes were given to those who were unable to pay for them.

There were over three hundred cases of tonsils and adenoids found in the schools this year. I have succeeded in having thirty operated on at different times. Nearly all of the others have been referred to their family physician. In some cases parents have refused to allow operations.

I wish to acknowledge with gratitude the cooperation afforded by local physicians and dentists, to Dr. Young and the associated charities.

I wish especially to thank Dr. Howard Hill for services rendered, also Dr. Johnson for the work on children's teeth.

The success of this department in the past years is largely due to hearty cooperation shown by the parents, teachers and others concerned.

The following is the summary of the work:

Schools	Visits
Walnut St. ....	54
Myrtle St. ....	59
Brook St. ....	22
North Grammar ....	46
Senior High ....	7
Junior High ....	32
Western Ave. ....	19

At the beginning of the school year physical examination was made of each child by Dr. B. O. Goodrich, School Physician. Children were weighed and measured.

Respectfully submitted,

MARY D. MADDOCKS, R. N.

Waterville, Maine, January 23, 1926.

Mr. C. E. Glover,  
Superintendent of Schools,  
Waterville, Maine.

Dear Mr. Glover:

Speaking from a Physical Director's point of view there are two things that stand out prominently in the needs of the Waterville high school.

1. An athletic field.
2. A new basket ball court.

I understand the matter of an athletic field has been taken up by the Chamber of Commerce and a committee has been appointed to take steps toward securing one.

The basket ball court at the Senior high school is a great handicap to the home team and visiting teams on account of its construction. The low ceiling and the steam pipes running directly over the baskets, make it difficult for them to do good work and causes much criticism from the visitors.

Therefore, I recommend that the Senior high school team be allowed to use the Junior high school gymnasium for their basket ball games.

Yours very truly,

ELLSWORTH W. MILLETT,

Physical Director Waterville High School.

---

## CONCLUSION

During the year the work we have attempted has been greatly aided by the splendid attitude on the part of the public in general. We are mindful of the inspiration afforded by those busy people who have given their time to address the students or visit the classrooms. The attitude of the press has done much good and is thoroughly appreciated. To His Honor, the Mayor and to the City Government we are grateful for their generous financial support without which our whole endeavor would fail.

In writing this report the aim has been to present the case of the school department fairly, without prejudice or favor, so that he who reads may more fully understand the nature of the work we are trying to do. Let me here publicly express my personal appreciation to the Board of Education for the counsel and assistance they have given me to so marked a degree.

C. E. GLOVER,

Supt. of Schools.

February 1, 1926.

## City Solicitor's Report

---

To the Honorable Mayor and City Council:

In a growing city like Waterville, ever enlarging its burdens and responsibilities, its management by the municipal officers very truly resembles that of a large business corporation, naturally attended by frequent legal questions arising in the various departments of the city's affairs. During my term of office, I have been called upon, from time to time, by the heads of these departments for advice and guidance where legal points were involved, and this phase represents the greater part of my services as solicitor.

The case of City of Waterville vs. Commercial Casualty Insurance Company, commenced by my predecessor in office, was successfully settled during the past summer and the City received a check in full reimbursement for the expenses incurred in completing the work on Chaplain Street left unfinished by the contractors bonded by the defendant company.

The most important matter and the one most interesting and vital to the welfare of the citizens, which came up this past year, was the petition to the Public Utilities Commission, asking for the long needed alteration and reconstruction of the overhead bridge on North Street. Several hearings have been held, plans have been submitted and accepted, and we are now waiting for the decree of the Commission, which, I feel safe in saying, will be favorable to the interests of the City and will result in the acquiring of a steel bridge of greater width and safer design, at a very low cost to the city coffers.

At this time I want to express my appreciation to the Mayor, the members of the City Government, and the heads of the various departments for their cooperation, and to assure them that my relations with them, in my advisory capacity, have been most pleasing and agreeable.

Respectfully submitted,

CYRIL M. JOLY,

City Solicitor.

# Report of Fire Department

---

To the Honorable Mayor and City Council:

I have the pleasure to herewith submit the following report of the Fire Department for the year ending January 31, 1926:

## BOARD OF ENGINEERS

Walter W. Berry	Chief Engineer
Luke Ivers	First Assistant Engineer
Walter McAlary	Second Assistant Engineer
E. W. Crawford	Engineer

## DRIVERS

- Ernest H. Clark, driver of Hook and Ladder Co., No. 1.
- Robert Beane, driver of Auto Combination and Chemical.
- John Campbell, driver of Hose Company, No. 2.
- Charles LeBrun, driver of Hose Company, No. 3.
- Wallace Gullifer, driver of Hose Company, No. 4.
- Ralph Blunt, spare driver.

## CHEMICAL COMPANY NO. 1

E. G. Pullen, Captain, Chaplin St.; F. J. Wilson, Lieutenant, 17 1-2 West St.; Harry H. Ware, Clerk, 7 Elm Court; S. A. Dickinson, Steward, 11 Union St.; Robert E. Brown, Hoseman, 55 Elm St.; E. S. Gilman, Hoseman, 4 Carroll St.; Ralph Gilman, Hoseman, 9 North St.; Fred Soper, Hoseman, 16 Morrill Ave.; Irving H. Staples, Hoseman, 26 Edgemont Ave.; Rufus Page, Hoseman, 17 Brook St.; Benjamin Pierce, Hoseman, 35 Elm St.;

Wayne Kennedy, Hoseman, 7 Boutelle Ave.; Charles Sweet, 1st Substitute, 5 Carroll St.; Raymond Giroux, 2nd Substitute, 77 Elm St., "The Melcher".

#### HOOK AND LADDER NO. 1

E. G. Pullen, Captain, Captain, Chaplin St.; F. J. Wilson, Lieutenant, Oak St.; J. J. Lintern, Clerk, Prospect St.; J. W. Jones, Charles St., E. Hopkins, Oak St., J. J. Smith, Prospect St., J. H. Hall, North St., S. Linnell, Front St., Joseph Moreau, Nash St., J. Campbell, Gilman St., Hugh Bowdoin, Main St., Clifford Devine, Central Station, Adolphe Poulin, Temple St., Harold Pullen, Chaplain St., C. Brewer, Silver St.

#### HOSE COMPANY NO. 2

James Coombs, Captain, 31 Elm St., James Allen, Lieutenant, 24 Pleasant St.; Walter Palmer, Clerk, 13 Nash St.; Walter Austin, 7 Nudd St., Warren Moses, 197 Main St., Fred Groder, 50 Oak St., Joseph Porier, 53 Oak St., Fred Piper, 13 Western Ave., George Beckett, 9 Autumn St., Luke Ivers, 85 Front St., Merle Parsons, 5 Messalonskee Ave., William Harding, 33 Summer St., Charles Ivers, Substitute, 3 Charles St.; Fred Turner, Substitute, Central Station.

#### HOSE COMPANY NO. 3

Alfred Maheu, Captain, 20 Grove St.; Willaim Pooler, Ass't Lieutenant, 13 Paris St.; Alfred Maheu, Clerk, 208 Water St.; Omar Pooler, 174 Water St.; Vidal Gagnon, 164 Water St., Arthur Landry, 17 Paris St.; Ernest York, 9 Carey Lane; Albert Pooler, 174 Water St.; F. Boulette, 165 Water St.; George Vashon, 126 Water St.; Dana Roberge, Substitute, 15 Halde St.; Clifford Pooler, Substitute, 13 Paris St.

#### HOSE COMPANY NO. 4

N. J. Marshall, Captain, 17 Edwards St.; William Huard, Lieutenant, 53 Ticonic St.; Ernest Marshall, Clerk, 21 Brook St.; J. A. Marshall, 21 Edwards St.; Ernest Pooler, 13 Brook St.; Ernest Toulouse, 39 Ticonic St.; Arthur Norman, 35 Elmwood Ave.; A. C. Bushey, 33 Elmwood Ave.; John Traynor, Hose House, No. 4;

Albert Roderick, 23 Kelsey St.; Alton Butler, Substitute, 3 Edwards St.; Isaac L. Dansky, Substitute, 36 Ticonic St.

### APPARATUS

Jan. 24. Still Alarm, 12.35 P. M., 7 Lawrence St., owner Jaul Lemieux; occupant, same.

### RECOMMENDATIONS

In closing this report I am pleased to state that this Department has responded to only 175 calls this year; 48 box alarms and 127 still alarms, and the loss sustained from the same has been very small.

I wish to call the attention of the City Government to the fact that for the past years, the department has been run on a small amount of fire hose, and it is my personal opinion, that this should be changed at once, and a plan adopted of making a purchase each and every year of 3,000 ft. of first class Woven Double Jacket Fire Hose.

Just a word right here—it has been my personal plan to purchase this hose from one of two companies, and I have been successful most of the time in carrying this program out, but once in

a while some smart Fire Committee takes it upon themselves to make a purchase from some other Company, and the City suffers thereby. Now there should be no let up on this program of purchasing hose, until the Department has at least 12,000 ft. of A1 hose. The Sewer Department should not be allowed use of any Fire Department hose, but should have hose of their own. And it is also plain to me, that the Fire Department account should receive credit from the Street Department account, for rent, from the use of the stable in the rear of the Central Fire Station. And the Central Station should receive repairs this present year, which are imperative.

It seems to be a common case for every City Council to slide the Fire Department by, but it is not a good business policy to adopt from now on.

In closing, I wish to mention that this is my twenty-fifth year with the Department, and twentieth as Chief, and I wish to thank his honor, the Mayor, and City Council, for their consideration to this Department the past year.

Respectfully yours,

W. W. BERRY. Chief.

## Support of Poor

---

To the Hon. Mayor and City Council:

Total			\$ 1,799 08
Making cost of City Home for the year			\$ 1,882 90

In closing my report I want to thank the Mayor and the City Government in general for the support and cooperation they have given me. I have no apology to make for the amount of money spent in this department and I don't think any is necessary. After taking into consideration the amount of unemployed the past year due to the fact that most of the industries were on part time it seems to me that the amount spent under those conditions is small compared with previous years.

An unusual burden on this department this year has been the pauperizing of families where the head of the family had been sent to Augusta to do time for some case or other. I have devoted all my time to this work and nothing else and I have not given help to any one without first investigating thoroughly. The income from the city home this year has been considerable less than in previous years due to the fact that all state paupers have been moved to Portland by orders of the state overseers. Thereby cutting the income to a great extent.

Respectfully submitted,

H. W. BUTLER.

## Auditor's Report

---

Waterville, Maine, Feb. 10, 1926.

To the Honorable Mayor and City Council:

In accordance with the provisions of the City Ordinance, I am submitting herewith the annual report of the City Auditor for the fiscal year ending January 31st, 1926.

The attached report contains the following:

1. Statement of Assets and Liabilities
2. List of Municipal Property
3. Detailed Account of Revenue and Expenditures
4. New Junior High School Account
5. Outstanding Temporary Loans
6. Funded Debt
7. A report showing the various appropriations in the different departments, the revenues and other credits, and the net cost of each for the fiscal year.

I have examined the books and accounts of the City Treasurer and Tax Collector, also those of the Pine Grove Cemetery Committee, and find them to be correct.

Respectfully submitted,

LORIMER H. DIXON, Auditor.

Cash, Ticonic Bank, F. H. Austin sup't .....	91	79	\$ 15,497 25
<hr/>			

In submitting our reports at this time, we wish to call your attention to the fact that there are only seventy-eight lots remaining unsold in the present cemetery, as laid out.

The City Engineer has prepared a new plan of the entire Cemetery, showing all the present lotting. He has been authorized to lot out several small sections not now in condition for sale. The total number so added however will not be equal to the number usually sold each year.

Under the conditions it is imperative that the new addition recently purchased, be laid out into lots at once. In this connection

it will probably be necessary to have some new ordinances passed regarding the prices of lots sold in the future, and regulations regarding same.

Respectfully submitted,

F. J. ARNOLD

O. A. MEADER

GEO. L. CANNON

Cemetery Committee.
